

Easy steps to get CGHG incentives:

- 1 Contact us to book pre-retrofit energy evaluation.
- 2 Complete eligible retrofits.
- 3 Book post-retrofit energy evaluation to claim incentives.

**GET UP TO \$5,600
IN HOME RETROFIT INCENTIVES**

Canada Greener Homes Grant		Efficiency Manitoba
ATTIC INSULATION		
Achieve RSI 8.81 (R-50) to existing \leq RSI 2.11 (R-12)	\$1,800	Achieve R-50 to existing \leq R-30 Kneewall: Achieve R-24 to existing \leq R-8
Achieve RSI 8.81 (R-50) to existing RSI 2.11-4.40 (R-12 to R-25)	\$600	
Achieve RSI 8.81 (R-50) to existing RSI 4.40- 6.16 (R-25 to R-35)	\$250	
CATHEDRAL/FLAT CEILING INSULATION		
Add RSI 3.52 (R-20) to uninsulated	\$600	Achieve R-28 to R-50 to existing \leq R-30
Achieve RSI 4.93 (R-28) to existing \leq RSI 2.11 (R-12)	\$600	
Achieve RSI 4.93 (R-28) to existing RSI 2.11-4.40 (R-12 to R-25)	\$250	
EXTERIOR WALL INSULATION		
Add RSI 3.52 (R-20)	\$5,000	Cavities: Achieve R-12 to R-24 to existing \leq R-12 Continuous: Achieve R-3.75 to R-10 to existing uninsulated
Add RSI 2.11-3.52 (R-12 to R-20)	\$3,800	
Add RSI 1.32-2.11 (R-7.5 to R-12)	\$3,300	
EXPOSED FLOOR INSULATION		
Add RSI 3.52 (R-20)	\$350	
BASEMENT INSULATION		
Add $>$ RSI 3.87 (R-22) to walls	\$1,500	Achieve R-24 if uninsulated, heated by natural gas Achieve R-24 if insulated R-12, heated by electricy, etc.
Add RSI 1.76-3.87 (R-10 to R-22) to walls	\$1,050	
Add RSI 3.52 (R-20) to headers	\$240	
Add RSI 0.62 (R-3.5) to floor slabs	\$400	
CRAWLSPACE INSULATION		
Add $>$ RSI 3.87 (R-22) to walls & headers	\$1,300	
Add RSI 1.76-3.87 (R-10 to R-22) to walls & headers	\$1,040	
Add $>$ RSI 4.23 (R-24) to ceilings	\$800	
AIR SEALING		
20% better than target ACH	\$1,000	
10% better than target ACH	\$810	
Meet target air changes per hour (ACH)	\$550	
WINDOWS AND DOORS		
U-value \leq 1.05 or ER \geq 40 (per window rough opening)	\$250	Triple pane (per window & door) - \$50 each
U-value 1.05-1.22 or ER \geq 34 (per window rough opening)	\$125	
U-value \leq 1.22 or ER \geq 34 (per door rough opening)	\$125	
HVAC SYSTEM		
Ground/Water Source Heat Pump (whole)	\$5,000	Advanced HRV Control - \$150
Ground/Water Source Heat Pump (heat pump only)	\$3,000	
Cold Climate Air Source Heat Pump	\$5,000	
Air Source Heat Pump (3 heads)	\$4,000	
Air Source Heat Pump (2 heads)	\$2,500	
DOMESTIC HOT WATER EQUIPMENT		
Domestic Hot Water (DHW) heat pump	\$3,000	
RENEWABLE ENERGY SYSTEMS		
Photovoltaic solar panels (per kW)	\$1,000	
RESILIENCY MEASURES		
Programmable or smart/adaptive thermostat	\$50	Smart thermostat - \$100
Batteries connected to PV system for standby power	\$1,000	
Self adhering roofing underlayment applied to entire roof	\$150	
Foundation waterproofing	\$875	
Crawlspace moisture-proofing	\$600	
EnerGuide EVALUATIONS		
Pre- and post-retrofit evaluations	\$600	

NOTES:

- All new equipment must be ENERGY STAR certified, on the [CGHG Eligible Product List](#), and purchased in Canada.
- All new equipment must be sized and installed by licensed and trained professional.
- Homeowners may stack grant funding with other retrofit grant programs but should not exceed 100%.
- The information provided here is for general information only. We provide energy evaluation services to support your submission, we do not guarantee approval of your application. Please visit www.nrcan.gc.ca and <https://efficiencymb.ca/> for complete program requirements.

Easy steps to get CMHC refund:

- 1 Check out CMHC Green Home website if you qualify.
- 2 Contact us to book energy evaluation.

About the CMHC Green Home:

CMHC Green Home offers a partial premium refund of up to 25% directly to borrowers who either buy, build or renovate for energy efficiency using CMHC-insured financing.

A Natural Resources Canada (NRCan) licensed energy advisor (**Mr. Peg Net Zero Solutions**) can assess the home's energy efficiency rating to support the application. The partial premium refund is based on the level of energy efficiency of your home.

BUYING OR BUILDING A HOME		Insurance Premium Refund
EnerGuide Rating at least 40% lower than typical new house		25%
EnerGuide Rating at least 15% lower than typical new house		15%
CHBA Net Zero Ready and Net Zero Homes		25%
R-2000 Homes		25%
ENERGY STAR Certified Homes		15%
Efficiency Manitoba New Homes Program		15%
BUYING A CONDO		Insurance Premium Refund
EnerGuide Rating, 40% more energy-efficient than baseline		25%
EnerGuide Rating, 20% more energy-efficient than baseline		15%
RENOVATING A HOME		Insurance Premium Refund
Pre-Retrofit	Post-Retrofit	
EnerGuide Rating < 200	Lower rating by at least 45 GJ/year	25%
EnerGuide Rating < 200	Lower rating by at least 20 GJ/year	15%
EnerGuide Rating ≥ 200	Lower rating by ≥ 90 GJ/year and to ≤ 250 GJ/year	25%
EnerGuide Rating ≥ 200	Lower rating by ≥ 15 GJ/year and to ≤ 250 GJ/year	15%

NOTES:

- Download the [Green Home application form](#) to apply. Your application must be submitted within 24 months of the closing date of your mortgage.
- View [Sample EnerGuide Label for Homes](#)
- View [Sample EnerGuide Homeowner Information Sheet](#)
- View [Sample Renovation Upgrade Report](#)
- The information provided here is for general information only. We provide energy evaluation services to support your submission, we do not guarantee approval of your application. Please visit www.cmhc.ca/greenhome for complete program requirements.
